

Integrate your yards with your office!

SMARTARS

SMART ANIMAL REGISTRATION SYSTEM

**WORLD
FIRST**

AUD \$995*

The Low-Cost, Next-Generation Weighing Device that puts weight and RFID in your hand, and connects your yards with your office.

Why You Need a SmartARS

- Next-generation livestock weighing device
- Email reports directly from your yards
- A cloud-based service providing animal data storage and instant weight gain
- For little cost, Smart-ARS saves immense amounts of time and greatly reduces stress on livestock during processing
- Works with existing crush, leveraging leading weighbars and RFID readers
- Easy to set up: plug and play
- Standard iPhone/iPad used as live display panel of weights and animal data
- Works with iHerd—The world's leading stock management app
- Save labour costs
- Control Box accepts input from various devices
- Communicates with Smartphones

Connectivity

- Connectivity to all modern scales currently on the market (adaptors may be required)
- Takes input directly from weighers (all models with adaptors if required) and replaces your existing head unit.
- Connectivity with most RFID scanners. Standard RFID serial input with a serial to usb adaptor.
- Interact and synchronise via mobile devices with iHerd application
- Requires 12 volt supply
- BlueTooth Link (range up to 150m)
- Soon able to connect to more devices: rain gauges, cameras, water and feed monitors, satellite internet, gate controllers, water feeders and more.
